

Ayer's Sarsaparilla is a tonic and alterative, free from alcohol. What is a "tonic"? A medicine that imparts strength or tone; a medicine that builds up, gives vigor and power. What is an "alterative"? A medicine that alters or changes unhealthy action to healthy action. Ayer's Sarsaparilla does all this without stimulation. Ask your doctor if a famlly medicine, like Ayer's Sarsaparilla, is not vastly better without alcohol than with it.

DENIES PORTION OF HARDWICK'S REPORT

E. Faxon Bishop Says That No Allotment of Territory Agreement Exists.

That part of the Hardwick congressional committee report which cites an alleged contract between Honolulu Plantation and the Western and the California-Hawaiian Sugar Refining Co., as evidence of "an allotment of territory'' in violation of the Sherman law, is declared by E. Faxon Bishop, head of the agency which manages the plantation, and also interested in the California-Hawaiian refinery, to be unfounded.

The Hardwick committee's report named a long list of examples which are said to prove that the socalled "in-dependent" sugar refineries are not really independent. It cites the much I discussed agreement whereby the California company shut up shop for some years, renting its plant to the rival company for \$200,000 a year, and then adds: "In this connection it seems from the testimony of Mr. C. Spreckels that an allotment of terri-tory and product exists between the Western (American), the California-Hawaiian, and the Honolulu Plantation

When this was shown to Mr. Bishop ports yesterday, he said that no contract existed for an allotment of territory between the reflucries. "We have been very careful about making contracts," Str said Mr. Bishop, "and have certainly not made any like this. As far as the leasing of the refinery was concerned, p. m. that was really a matter of financial necessity. We came to the conclusion a year after the leasing contract was made that it might be a dangerous one. it was made because we had lost out en beets and wanted to quit for a few years, to 'hold our breath.' At the end of the contract we opened again, and are now doing the bulk of the busi-

There is absolutely no agreement in existence for the allotment of territory. Of course if the other refinery cuts prices, we have to do the same, and vice versa. This occurs in the ordinary course of business. The proposition makes the two concerns pretty near follow one another's figures. But both are doing husiness in the same territory."

Oluce, Mrs. K. M. Lord, forwarded through a Methodist minis. Mrs. E. P. Halton, Mrs. E. P. Thomp- ter at Greencastle, Indiana.

OLAA PLANTATION IN SPLENDID CONDITION

Annual Report Shows Property Has Paid More Than Quarter Million Indebtedness.

"During 1911 the Olan plantation iped out \$349,757.53 of its floating inchtedness." The above statement ade by S. M. Damon on behalf of Bishop & Co., the agents of the plantation, sounded the keynote of yesterar Company.

The plantation had the hest financial ear in its history, during 1911, both the crop and the profit thereon, being the largest on record.

The 1911 crop amounted to 25,096 tens, harvested from 6,481 acres, or an average of 3.87 tons of sugar per aero as against 3.18 tons per acre for 1910 and an average of 2.80 tons for 1909. Mauager Jno. Watts' estimate of the tonnage of the crop was exceeded by Kobe 3,096 tens.

The profit on the 1911 Sugar crop alone, was \$317,426, other receipts bringing the total up to the amount above stated by Mr. Damon.

Increased Acres.

The manager's report states that the crep for 1912 will be harvested from 6,253 acres, and he estimates the amount of sugar yield therefrom to be about 25,000 tons.* Those who have recently seen the plantation consider his a conservative estimate.

If the present price of sugar holds, and the crop comes up to estimate, the floating debt should be entirely wiped out during 1912, leaving a fair cash surplus to begin 1913 with. The following is Mr. Damon's state-

nent in full:

"Representing the agents of the Olas company, and supplementary to the information contained in the annual re-port just submitted, I would like to add some additional facts and figures which will perhaps give shareholders a clear-er understanding of the present status

of their property.

"During 1911, the plantation wiped out \$349,757.53 of its floating indebt-edness, leaving an amount of \$384, 153.06 still owing, as shown by the balance sheet. Contained in this last named sum, however, is \$149,649.41 of advances which the planters owe the plantation and which, if called in, would leave the company's floating debt at \$234,503.65.

Buys Stock.

"Then again, from the period whe Bishop & Co. became agents of the company, the plantation has acquired 1,826 shares of the capital stock of the and wife, Mrs. F. Cerreira and child, Miss Meland Louise, Wm. Payne and wife, Mrs. L. L. Porter, Mrs. Creede Wilson, Mr. and Mrs. W. R. Hill, C. W. Brunstad and party, Mr. Lohmann and a share or \$365,200.00. But figuring it as worth only the amount paid for it, plus the interest which the Olan company paid for the money advanced to

parchase it, the value is \$238,452.00.
"There is not the slightest intention to part with this stock but assuming, advances to the planters were collected, the Olan company would have a credit with its agents of \$3,948.35 as at 31st December, 1911, instead of an overdraft as shown in the accounts, and this credit balance would have been further augmented by approximately \$20,000,00 had we not spent this amount of money, during the past year, in betterments, which have of course, increased the assets of the company.

Additions to Property.

"The most important additions to property and plant during 1911 were a new Baldwin lecomotive costing \$10. 832.09, a second sugar dryer \$2,700.00, new houses for laborers \$1,953.97, and \$1,975.64 for developing tributary water supply in the hills to help keep the flumes better filled dur-

ing dry weather. "When the position of the company is thus analyzed it seems, to my mind to be very satisfactory indeed and with larger crops in sight the outlook

most encouraging. "Both at Olan and Puna there are still large tracts of land owned or con-trolled by the plantation which can be brought under cane and which gradually be planted up as labor condi-

tions justify. "Around Mountain View, which is at seventeen miles, Volcono road, there is a large area lying fallow principally beause our standard cane, Yellow Caledonia, and other varieties which we have tried there have not hitherto been a success. Now we appear to have found a cane well adopted for this section which has an elevation of about 1,600 teet. This is the Demarara 1135 and Hamilton and wife, W. K. Kellog, we are taking off a 10-acre patch of it Loftus, Mrs. S. Merrill, E. W. Olds this season which the manager estiwe are taking off a 10-acre patch of it R. Loftus, Mrs. S. Merrill, L. A. Steen, mates will go five tons of single and wife, H. H. Prouty, Fred N. Steen, mates will go five tons of single and wife, H. H. Prouty, Fred N. Steen, mates will go five tons of single single steel and single ise of equally good results at maturity. if our hopes are realized with Dema-rara 1135 we expect to largely increase our planted area around Mountain View in the near future."

The election of officers resulted as fol-

Lorrin A. Thurston, president; Walter Dillingham, first vice-president; E. Mott Swith, second vice-president; W. Van Valkenberg, secretary; Jas. Cockburn, treasurer; Robert Catton, Harris McKenzie, directors; Audit Co. of Hawaii, auditor.

SON OF FIRST PRESIDENT

(Continued from page one.) "I stayed in Nanking for a week, during which time I visited the ruins of the Ming palaces, the famous Ming Tombs, the Purple Hill, the Petchiko or North Pole Tower, the ancient stone wall and other places of note.
"Now, I am in Shanghai waiting for the arrival of my mother and sixters,

who will be here on the 19th. Aloha nui to you and Mrs. Damon. Yours re-spectfully. SUN FO." spectfully,

The house committee on foreign af-fairs reported favorably a bill making the services of the National American Red Cross available in time of threatened war, as well as in war. Under the president in threatened troubles, such as those on the Mexican frontier.

BOARD OF AGRICULTURE 'AND FORESTRY.

FRUIT FLY CONTROL RULE XIV.

RULE AND REGULATION OF THE BOARD OF COMMISSIONERS OF AGRICULTURE AND FORESTRY, CONCERNING HORTICULTURAL SANITATION OF THE ISLAND OF HAWAIL

WHEREAS, the Mediterranean Fruit Fly has obtained a footbold in the Dis-

trict of North Robala, Island of Ha-

The Board of Commissioners of Agriculture and Forestry of the Territory of Hawaii hereby make the following rules and regulations for the purpose of controlling, diminishing or eradicating said Mediterranean Fruit Fly and other injurious fruit flies and larvae thereof and preventing or diminishing the loss cansable by them.

SECTION 1. All fruit, ripe or unripe, except bananas and pineapples, whether on the ground or on the tree or elsewhere on any premises within the District of North Kohala, shall be celletted by the owner, occupant, or controller of the preperty on which such fruit exists, and thoroughly destroyed by burning or by such other effective means as the duly appointed agents of the Board of Agriculture and Forestry may deem sufficient, or so treated as effectually to destroy any larvae therein of any Mediterranean Fruit Fly or other injurious fruit fly; and all vegetables on any premises within said District which appear to be infected or of varieties liable to infection by the Mediterranean Fruit Fly or other injurious fruit fly or the larvae thereof shall be collected by the owner, occupant or controller of said premises and thoroughly destroyed by burning or by such other effective means as the duly appointed agents of the Board of Agriculture and Forestry may deem sufficient, or so treated as effectually to destroy any larvae therein of any Mediterranean Fruit Fly or other injurious fruit fly.

SECTION 2. Inspectors and other duly appointed agents of the Board of Agriculture and Forestry are hereby empowered to enter and inspect any and all premises in said District of North Kohala and enforce the provisions of Section 1. They are also hereby empowered to remove or cause to be removed from fruit trees and shrubs and plants, any and all fruit and any and all such vegetables, and cause the same to be destroyed, treated or disposed of in the manner prescribed in Section 1.

SECTION 3. No fruit, melon, or vegctable infected by any such fruit fly or the larvae thereof shall be offered or exposed for sale, and any such infected fruit, melon or vegetable found exposed for sale may be seized by any inspector or other duly appointed agent of the Board of Agriculture and Forestry and destroyed.

SECTION 4. All persons are hereby prohibited from carrying or transporting any fruit, melon or vegetable from the Districts of North or South Kohala to any other District on the Island of Hawaii, and inspectors and other duly appointed agents of the Board of Agriculture and Forestry are hereby empowered to examine and inspect all freight, baggage and belongings carried or transported from either of said Districts of North and South Kohala to any other District on said Island of Hawaii and to destroy, treat or dispose of in the manner prescribed in Section 1, any fruit, melon or vegetable found in any such freight, baggage, or belongings or otherwise so carried or
